Modern Technology for Your Laboratory

Mini Straws For Cyropreservation

MEA Tested

Ministraw 0.25cc 133mm with identification stick in different colours, Suitable for standard slow rate freezers. MTG19040/0010 \$23.00 pkt 10

Ministraw 90mm with identification stick in different colours. Suitable for Cyrologic Freezer. MTG19040/9010 \$23.00 pkt 10.

Ministraw 0.25cc 133mm with glass sealing balls. Suitable for Cryologic freezer. MTG19041/0010.

Ultraseal 21 Ultrasound Sealer

The alternative to thermal sealing

- Absolutely tight welding seams
- Suitable for all diameters of MTG straws
- Simple and safe handling
- Ultra rapid sealing
- Virtually no heat generation
- No overheating of seal
- Intensity continuously adjustable
- Sealing process is indicated via LED

MTG13135/0200 \$4,740.00

Heat Sealer for Straws

Heat sealer for straws with electronic temperature control & digital display, extra wide sealing clamps with heat resistant silicone cover, heats up rapidly & maintains temperature accurately.

MTG13135/0100 \$1,677.00

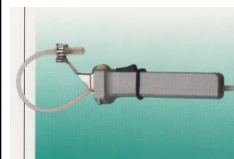

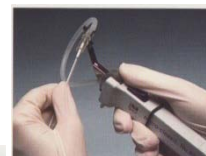

Micropipettor for Transferring Oocytes and Embryos

Easy and precise handling of cells and filling of straws. Tube and adaptor can be sterilised. Very helpful tool for vitrification.

MTG19022/0000

Spare adaptor for micro pipettor, disposable.

MTG19022/0001

Cassettes for Storage of Straws

Triangular cassettes, long, 280mm.

MTG 16981/0140 \$734.00

Triangular cassette, short, 140mm.

MTG16981/0120 \$511.00

Multi-purpose cassette, long, 280mm.

MTG16980/1201 \$509.00

Multi-purpose cassette, short, 140mm.

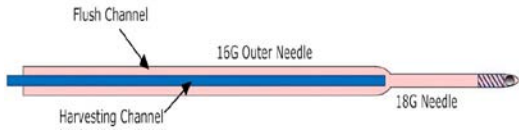

MTG16980/0601 \$511.00

Various colours, packaged in units of 100.

Price Competitive - Rocket Medical Catheters & Needles

Rocket NX Double Lumen Oocyte Aspiration Needle

A continuous needle tube with a swaged (reduced) distal end which narrows from 16g to 18g for the distal 7cm which gives the rigidity and high flow rates of a 16g tube but with the advantages of a smaller, sharper 18g needle to penetrate tissues and follicles.

Rocket SX Spiral Echo Single Lumen Needle with Oxford Style Tubing Set

NEW Oxford Tube Set

New SX Spiral Echo Single Lumen Harvesting Needle with high resolution echogenic surface preparation to give smoother, easier tissue penetration with extreme ultrasound definition.

New Bevel Design New Shape Finger Grip
Soft, Kink Free Toxicity Testing Sterile

SX Spiral Echo Single Lumen Needle

Embryon® Single Lumen IUI Catheter
Embryon® Double Lumen IUI Catheter

ESL Single Lumen dual diameter catheter with 5 x 1cm markings, atraumatic distal tip & dual side eyes for easy gentle insemination.

EDL Double Lumen catheter with integral stylet wire, 5 x 1cm markings, atraumatic distal tip & dual side eyes for insemination where a pre-formable catheter is required to gain access.

Sterile – Gamma Irradiated

Embryon BulbTip Embryo Transfer Catheter

- **New** BulbTip Outer Sheath to improve insertion
- **New** Ultrafine Inner Transfer Catheter to minimise media volume on transfer

- **New** Sliding Silicone Marker to allow insertion depth to be pre-set
- Patented Finger Grip gives unequalled grip & control
- Toxicity Testing
- Sterile

Staff News

Gytech would like to welcome Daniel Tidey & Dan Hinch to the sales team. Daniel Tidey has joined Gytech as our National Sales Manager and Dan Hinch as our Account Manager servicing Victoria. Welcome to you both.

Humagen ICSI Pipettes

Gytech has identified the specifications of the ICSI pipettes most commonly used in IVF Centres throughout Australia, and now has Humagen ICSI pipettes available in the same specifications. Humagen has a long history in IVF and was the first commercially available microtool back in 1993.

- HMIC-6um-30-B1.0
- HMIC-SI-30-B1.0 (7um)

- HMIC-6um-35-B1.0
- HMIC-SI-35-B1.0 (7um)

MidAtlantic DIAGNOSTICS, INC. The New Stripper BP

Designed the same as the Swemed Pipettor, the new Stripper BP handle and tips are now available.

The Stripper BP is:

- Flexible, unbreakable
- Designed not to scratch dishes
- Eliminates risk of needle stick injury
- Ergonomic handle design for greater comfort & control

Embryon® Single Use Ultrasound Needle Guides

- **COMPATIBLE** with standard Hitachi, Toshiba, Siemens, ATL-Philips, GE Health
- **ALL GUIDES ACCEPT NEEDLES** up to 15g and >150mm in length
- **STERILE, SINGLE USE** eliminates costly reprocessing concerns, damage or incompatible guides and potential cross infection risks
- **COST EFFECTIVE**

Rocket Medical Craft Suction Pumps

Craft Suction Pumps provide a low volume, adjustable vacuum source for oocyte aspiration.

Vacuum fully adjustable from 0-400mm Hg.

Fluid trap prevents accidental aspiration of fluids into the vacuum unit.

All units feature super quiet diaphragm pumps for reliable, low maintenance service.
